A score of 215 on the NWEA MAP  
Reading is not equivalent to a score of 215  
on the NWEA MAP Math. Unlike many  
standardized tests, a student's RIT score  
should increase each year. If a student  
scores a 195 on the NWEA MAP Reading  
then one should expect the student to earn  
a higher score during the following term or  
year.

Understanding NWEA MAP(RIT) Scores

□ Resources by HEROES

But because MAP adapts to a student's current achievement level, MAP scores are as precise as they can be, and far more precise than fixed form tests of similar length. Understanding student's observed scores, and what the standard errors tell us about the observed scores, can help us to set more reasonable goals and draw more valid conclusions about students' performance and growth in ...

complexity of each MAP assessment question is measured using the RIT scale. A student's RIT score indicates the level at which the student was answering ...

## RIT Scores – For the Teachers

When students finish their MAP Growth test, they receive a number called a RIT score for each area they are tested in (reading, language usage, math, or science). This score represents a student's achievement level at any given moment and helps measure their academic growth over time. The RIT scale is a stable scale, like feet and inches, that accurately measures student performance ...

MAP® Growth measures student performance with our RIT scale—the most stable, mature scale in the industry. Like centimeters on a ruler, it measures in equal intervals, regardless of a student's grade or performance—and it remains stable over time.

NWEA: Fair, accurate results thanks to a best-in-class scale

"Equal interval" means that the difference between scores is the same regardless of whether a student is at the top, bottom, or middle of the RIT scale. "Stable" means that the scores on the same scale from

tional stages of the school year. For achievement status norms, a student's Rasch Unit (RIT) score is associated with a percentile that shows how well the student performed on a test compared to student peers in the norming group. The relative evaluation of a student's growth from one period to another (e.g., from fall to spring) is provided by growth norms. MAP Growth norms are ...
