Quizlet~~

Ecology is the study of how living things interact with each
other and their environment. Earlier this year we learned
about the levels of organization within an organism: cell-
tissue-organ-organ system-organism. Now we are looking at
the levels of organization starting at an individual (i.e.,
organism) and ending with the biosphere (i.e., earth).

7. What is the difference between a habitat and an ecosystem? There are many habitats within an ecosystem. A habitat refers to the living space of one organism, while an ecosystem has living space for many organisms of many different species. Within a forest ecosystem, a rotten log could be a habitat for fungi, worms, and salamanders. 8.

Goals The study of ecosystems is an introduction to the study of ecology and involves. investigation of the complex interactions between all types of organisms and their. environment. Students will learn that ecosystems consist of communities of plants and.

~~Ecosystem Grade 7 Worksheets – Kiddy Math~~

We study all of that in some depth in biology, and really ecology is a bit of a synthesis of a lot of what we learn, if anything, all of what we learn in biology because it's taking life, it's studying life at another level where it's not just the individual organism anymore, and it's not even just the population or the community, but we're talking about an even bigger system that is ...
