A Sunday at the Pool in Kigali is a moving, passionate love story set amid the turmoil and terror of Rwanda's genocide. All manner of Kigali residents pass their time by the pool of the Mille-Collines hotel: aid workers, Rwandan bourgeoisie, expatriates, UN peacekeepers, prostitutes. Keeping a watchful eye is Bernard Valcourt, a jaded foreign journalist, but his closest attention is devoted to Gentille, a hotel waitress with the slender, elegant build of a Tutsi. As they slip into an intense, improbable affair, the delicately balanced world around them—already devastated by AIDS—erupts in a Hutu-

led genocide against the Tutsi people. Valcourt's efforts to spirit Gentille to safety end in their separation. It will be months before he learns of his lover's shocking fate.

Swimming Pool Sunday by Sophie Kinsella, writing as Madeleine Wickham One shimmeringly hot Sunday in May, the Delaneys open their pool to the whole village for charity. Louise is there with her daughters, and while the children splash and shriek in the cool blue waters, she basks in the sunshine, attempting to ignore her estranged husband and dreaming of the new man in her life, a charismatic lawyer. The day seems perfect. Then a sudden and shocking accident changes everyone's lives forever. Recriminations start to fly. Whose fault

body. André, the eldest child, is nearing 60. He has never loved the father who lied too much, abused too much, manipulated too much. But still, this holiday week, André cannot help but be moved. How should he behave toward a parent to whom all pleasures are forbidden? Should he struggle to prolong the old man's life, or help him end it? Around the dinner table, opinions are divided. At once intimate and universal, *A Good Death* is a deeply moving voyage into the essence of humanity. In it, Gil Courtemanche once again asks readers to confront the question that lay at the heart of his first novel: Why live? Why die?

Wonder in this beautifully illustrated book. The sea is not made of water. Creatures are its genes. Look down as you crouch over the shallows and you will find a periwinkle or a prawn, a claw-displaying crab or a cluster of anemones ready to meet you. No need for binoculars or special stalking skills: go to the rocks and the living will say hello. Inside each rock pool tucked into one of the infinite crevices of the tidal coastline lies a rippling, silent, unknowable universe. Below the stillness of the surface course different currents of endless motion—the ebb and flow of the tide, the steady forward propulsion of the passage of time, and the tiny lifetimes of the rock pool's creatures, all of which coalesce into the grand narrative of evolution. In *Life Between the Tides*, Adam Nicolson investigates one of the most revelatory

habitats on earth. Under his microscope, we see a prawn's head become a medieval helmet and a group of "winkles" transform into a Dickensian social scene, with mollusks munching on Stilton and glancing at their pocket watches. Or, rather, is a winkle more like Achilles, an ancient hero, throwing himself toward death for the sake of glory? For Nicolson, who writes "with scientific rigor and a poet's sense of wonder" (*The American Scholar*), the world of the rock pools is infinite and as intricate as our own. As Nicolson journeys between the tides, both in the pools he builds along the coast of Scotland and through the timeline of scientific discovery, he is accompanied by great thinkers—no one can escape the pull of the sea. We meet Virginia Woolf and her *Waves*; a young T. S. Eliot peering

into his own rock pool in Massachusetts; even Nicolson's father-in-law, a classical scholar who would hunt for amethysts along the shoreline, his mind on Heraclitus and the other philosophers of ancient Greece. And, of course, scientists populate the pages; not only their discoveries, but also their doubts and errors, their moments of quiet observation and their thrilling realizations. Everything is within the rock pools, where you can look beyond your own reflection and find the miraculous an inch beneath your nose. "The soul wants to be wet," Heraclitus said in Ephesus twenty-five hundred years ago. This marvelous book demonstrates why it is so. Includes Color and Black-and-White Photographs
