This book outlines what theory for a global age might look like, positing an agenda for consideration, contestation and discussion, and a framework for the research-led volumes that follow in the series. Gurminder K. Bhambra takes up the classical concerns of sociology and social theory and shows how they can be rethought through an engagement with postcolonial studies and decoloniality, two of the most distinctive critical approaches of the past decades.

"Chowdhry and Nair, along with the authors of this volume, make a timely, vital, and deeply necessary intervention in international relations - one that informs theoretically, enriches our knowledge of the world through its narratives, and forces us to confront the differentiated wholeness of our humanity. Readers will want to emulate the skills and sensibilities they offer.." Naeem Inayatullah, Ithaca College This work uses postcolonial theory to examine the implications of race, class and gender relations for the structuring or world politics. It addresses further themes central to postcolonial theory, such as the impact of representation on power relations, the relationship between global capital and power and the space for resistance and agency in the context of global power asymmetries.

Soviet postcolonial studies is an emerging field of critical inquiry, with its locus of interest in colonial aspects of the Soviet experience in the USSR and beyond. The articles in this collection offer a postcolonial perspective on Baltic societies and cultures – that is, a perspective sensitive to the effects of Soviet colonialism. The colonial situation is typically sustained by the help of colonial discourses which carry the pathos of progress and civilization. In Soviet colonial discourse, the pathos of progress is presented in terms of communist value systems, which developed certain principles of the European Enlightenment and rearticulated them through Soviet ideology. This collection explores the establishment of Soviet colonial power structures, but also strategic continuities between Soviet and Tsarist rule and the legacy of Soviet colonialism in post-Soviet Baltics. Soviet norms and rules, imposed upon the Baltic borderlands, produced new forms of transculturation, gave birth to new cultural ' authenticities, " and developed complex entanglements of colonial, modern and national impulses. Analyses of colonial patterns in Soviet and post-Soviet Baltic societies helps bring us closer to understanding the Soviet legacy in the former Soviet borderlands and in present-day Russia. The chapters were originally published in a special issue of the Journal of Baltic Studies.

The Oxford Handbook of Feminist Theory provides a rich overview of the analytical frameworks and theoretical concepts that feminist theorists have developed to analyze the known world. Featuring leading feminist theorists from diverse regions of the globe, this collection delves into forty-nine subject areas, demonstrating the complexity of feminist challenges to established knowledge, while also engaging areas of contestation within feminist theory. Demonstrating the interdisciplinary nature of feminist theory, the chapters offer innovative analyses of topics central to social and political science, cultural studies and humanities, discourses associated with medicine and science, and issues in contemporary critical theory that have been transformed through feminist theorization. The handbook identifies limitations of key epistemic assumptions that inform traditional scholarship and shows how theorizing from women's and men's lives has profound effects on the conceptualization of central categories, whether the field of analysis is aesthetics, biology, cultural studies, development, economics, film studies, health, history, literature, politics, religion, science studies, sexualities, violence, or war.

Despite explicit commitments to gender equality, women experience complex modes of disadvantage and discrimination in all nations of the world.
