Downdraft Carburetor Tuning Guide Solex

Experiment that shows a Solex carburetor percolating and flooding due to heat. Heat is from a hot air gun on the left side.

Fire and ice . . . that's what you get when you take the cool looks of the Volkswagen Beetle, Bus, Karmann Ghia, Thing, Squareback or Fastback and unleash the hot performance of the air-cooled VW engine. How to hot Rod Volkswagen Engines gives the real skinny for breathing-on, blueprinting and bulletproofing your air-cooled Vee-dub. Street, custom, kit car, off-road, or full-race, this book gives you all the air-cooled engine-building basics to find and put to the pavement hidden horsepower. Includes tips on carburetion, ignition and exhaust tuning, case beefing, cylinder-head flow work, camshaft selection, lubrication and cooling upgrades, 6-to 12-volt conversions and much more. Plus there's a natty 6-page history of the origins of the first air-cooled VW engines. Go ahead. You deserve it! Double or triple the output of your air-cooled Volkswagen. Or add 10-15 horsepower with easy bolt-on mods. Mild or wild, do it the right way—with this book. More than 300 photos, drawings and charts to guide you through your VW's innards. And don't look back.

ORIGINAL DESCRIPTION (1958): " ... One of the most important factors in selecting or evaluating any sports car is a knowledge of its history and development. More than perhaps any other car, the Porsche is the creation of one man — Ferdinand Porsche. Here is the fascinating story of his life-long dedication to producing the finest sports machine that design and engineering could engender. But, of course, the Guide is so much more than a history. The various models are fully discussed, and there are detailed chapters on tuning and on accessories that give added performance—such items as volumetric efficiency, valve lash, the HL (high-performance engine), supercharging, improving the spark, camshafts, wire wheels, brake and clutch facings ..."

"At any price, Herr Dr. Porsche. At any price below 1000 marks (\$250)," laughed Hitler as he ordered the inauguration of the Volkswagen project in the late summer of 1933. The scene was Berlin's Hotel Kaiserhof where Hitler, meeting with Germany's most famous automotive engineer, Dr. Ferdinand Porsche, was outlining plans for a "people's car." Hitler wanted, for the German worker, a car that would travel the autobahns, at reasonably high speed, provide gasoline mileage in the 30 to 35 miles per gallon class and be simply constructed and inexpensive to repair. Also, it had to cost less than any other car on the European market.

Complete service and repair procedures for BMW (including 2002), Volkswagen (including Super Beetle), Mercedes-Benz (including diesel engine service), Audi, Porsche (including 914), Volvo (including 164), Saab (including 99), Fiat, Opel (including G.T.), Alfa Romeo.

" In view of the number of volumes that have been produced in recent years about Germany's most famous auto maker, it must seem presumptuous to add yet another to the stack. Being relatively thin, this one had to be different. It devotes itself to Mercedes-Benz cars and the most specific and personal aspects of their development, performance and maintenance, at the unavoidable sacrifice of portions of the long history of this great firm. The fascinating story of Mercedes racing has been told by George Monkhouse, Laurence Pomeroy Jr. and S. C. H. Davis, among others, while the fine successes of 1954 and 1955 are still familiar to most readers. I've chosen to concentrate on several Mercedes and Benz racing machines that were extremely interesting and productive yet remain virtually unknown today. At the other end of the performance scale the distinctive Mercedes diesels are covered completely..." (1959 - Karl E. Ludvigsen)

The Porsche 911 Buyer's Guide takes a year-by-year approach to what a prospective buyer should look for when evaluating a used 911. For each year, from 1965 to the present, the author examines the problematic areas of each model, what to ask the seller, and much more.

ORIGINAL DESCRIPTION (1959): " ... The Triumph Company has apparently always been in a hurry to get from one place to another. It began as a manufacturer of cycles back in the leisurely days of 1895. Triumph had established an excellent reputation for its motorcycles. Before World War I they had earned the rather apt sobriquet: "Frisky." One can well

imagine that with speedy, reliable motorcycles tooling about the countryside making a name for themselves, a light car would loom next on the horizon for Triumph. This was exactly the case. In 1931, the Triumph Cycle Company, having at last decided that they were in the automobile business for good, shortened their name to The Triumph Company..." The legendary TR series of sports cars, competition results, tuning and maintenance for everyday and racing.

"Tell me its pedigree and I'll tell you what kind of car it is!" According to legend, this pungent comment was made by the great Tazio Nuvolari when a manufacturer asked him to drive a new car in the German Grand Prix. West Germany's Auto Union products—the front-wheel-drive DKW 750 and the larger Auto Union S-1000 series—are direct descendants of the famous Auto Union racing cars that Nuvolari was later to drive to victory in the British and German Grand Prix races, and which literally cleaned up on the racing tracks of Europe before World War II ended peaceful competition between great automobile marques. These were the cars that would do 205 mph, weighed a mere 2,508 pounds, and were constructed with what one writer describes as an "unearthly kind of superior craftsmanship ..." (1961 - Keith Ayling)
