The DePuy Synthes Variable Angle Locking Hand System is intended for fracture fixation of the hand and other small bones and small bone fragments, in adults and adolescents (12-21 years) particularly in osteopenic bone. System indications include the following:

- Open reduction and internal fixation of fractures, mal-unions, and non-unions

Variable Angle Locking Hand System - J&J Medical Devices

The Variable Angle Locking Hand System provides an extensive range of basic and specialty plates for fracture repair and deformity correction. The system consists of 40 different plates, available in stainless steel and titanium, including fragment-specific plates designed for lateral and dorsal application.

Variable Angle Hand Locking System | J&J Medical Devices

The DePuy SynthesVariable Angle Locking Hand System consists of plates that are anatomic, procedure-specific, and available in both stainless steel and titanium. The Variable Angle Locking Hand System offers instrumentation to aid in: x fracture reduction x provisional fixation x plate adaptation x construct creation

VARIABLE ANGLE LOCKING HAND SYSTEM

1 DePuy Synthes Variable Angle Locking Hand System Surgical Technique The DePuy Synthes Variable Angle Locking Hand System consists of plates that are anatomic, procedure-speci? c, and available in both stainless steel and titanium. The Variable Angle Locking Hand System offers instrumentation to aid in:

- fracture reduction

VARIABLE ANGLE LOCKING HAND SYSTEM

The Variable Angle Hand Locking System Presented by Douglas Campbell, MD 0 views - 14 videos Watch this 14-part video playlist to learn more as Dr. Campbell describes the different types of implants, instruments, and the key features of the variable angle hand locking system.

Variable Angle Hand Locking System | Johnson & Johnson ...

The Variable Angle Locking Hand System has four key features:Versatility for greater surgical options with low-profile, Pre-contoured Plates designed to reduce potential soft tissue irritation, comprehensive Instrumentation designed for ease of use and Strength & Stability with Locked Plating

Variable Angle Locking Hand System - MrLoanBook

March 15, 2018 Part 3 of 5: Watch this video to learn more as Dr. Fischer demonstrates surgical techniques using the DePuy Synthes Variable Angle Locking Hand System in this five-chapter series. In this video watch Dr. Fischer demonstrate the surgical application of the First Metacarpal Plate, Lateral approach featured in the system.

VA Locking Hand System, First Metacarpal Plate, Lateral ...

Part 4 of 5: Learn more as Thomas Fischer, MD demonstrates surgical techniques using the DePuy Synthes Variable Angle Locking Hand System in this five-chapter series. In this video, watch Dr. Fischer demonstrate the surgical application of the phalangeal head plate featured in the system.

VA Locking Hand System - Phalangeal Head Plate with Thomas ...

Variable angle locking plate system for treatment of small bones including the hand and wrist. Plating that fits. The VariAX Hand Locking and Profyle Hand System which offers the benefits of a comprehensive range of variable angled locking and non-locking plating options to treat a full range of hand fractures.

VariAx Hand | Stryker

It consists of two modules: The VariAx Hand Locking Plate Module is a plating system which offers the bene?ts of variable angled locking plates and screws for 1.7mm and 2.3mm implant sizes. The Profyle Hand Standard Plating Module builds upon the strong foundation of the Profyle, which has been in the market since 1994.

Stryker Hand Plating System

1. Designed to be used with any plate in the Hand Fracture System, 1.5 mm and 2.3 mm Hexalobe MultiScrews act as nonlocking screws when inserted into unthreaded slots and locking variable angle screws when inserted into threaded holes. The Hexalobe MultiScrew design allows for angles of up to 15 degrees in any direction for a total of 30 degrees.

Hand Fracture System | Acumed

March 15, 2018 Part 1 of 5: Watch this video to learn more as Dr. Fischer and Dr. Richard demonstrate surgical techniques using the DePuy Synthes Variable Angle Locking Hand System in this five-chapter series. In this video, they provide an overview of the system and focus on the comprehensive instruments available in the set.

VA Locking Hand System & Instrument Overview | VuMedi

The new Variable Angle Locking Hand System includes 40 basic and specialty plates to accommodate a variety of hand fractures and hand sizes. The system is the first to feature 1.3 mm locking screws for hand plating and also includes 1.5 mm and 2.0 mm variable angle locking plates.

DePuy Synthes Launches New Variable Angle Locking Hand System

The new Variable Angle Locking Hand System includes 40 basic and specialty plates to accommodate a variety of hand fractures and hand sizes. The system is the first to feature 1.3 mm locking screws for hand plating and also includes 1.5 mm and 2.0 mm variable angle locking plates.

DePuy Synthes Debuts Variable Angle Locking Hand System ...

Additionally, the A.L.P.S. Hand Fracture System allows the use of locking, variable angle, and standard screws. This hybrid fixation concept allows the surgeon to stabilize the fracture either by the use of lag screw techniques through the plate, or by compression plating techniques.

A.L.P.S. Hand Fracture System - Zimmer Biomet

Variable Angle Locking Screws Acumed Variable Angle Locking Screws can aid in the capture of specific fragments or accommodate variations in patient anatomy. They can be used in any distal hole of any of the gold colored Acu-Loc 2 Proximal VDR Plates or Acu-Loc Extra Articular Plates. The screws allow for a total variance of 5 mm or 15 degrees.
